## 2025 EDITORIAL CALENDAR

AI has been present in the enterprise for a number of years. The arrival of generative AI (GenAI) has focused even more attention on AI technologies. GenAI takes AI beyond machine learning (ML), natural language processing (NLP), natural language understanding (NLU), deep learning, algorithmic search results, and computer vision. It adds more acronyms to our lexicon—LLMs (large language models), SLMs (small language models), and GPT (generative pre-

trained transformers). Enterprise AI has the potential to change how work is done. *Enterprise AI World* aims to reach the people who are building, deploying, and managing AI systems and applications as well as AI users. *Enterprise AI World* follows the rapidly changing technologies and keeps readers up to date with how AI will affect them.
